

Free Seminars for **Green STEM for the Future**

As part of the Yorkshire Forward funded project 'Green STEM for the Future', SETPoint Humberside can offer together with the University's Environmental Technology Centre for Industrial Collaboration a series of 'bite-sized' seminars over the coming months and we would like to invite you to take part. The seminars are intended to add further information to materials that have been developed so far, but are not necessarily limited to them and will set a wider and contemporary context. It will also help to establish closer contacts between teachers interested in engaging their pupils in aspects of the environment and businesses already working to make a positive impact.

All seminars will start at 17:00 and are expected to last for 1 ½ hours. Light refreshments will be provided.

Topic	Presenter	Location	Date
Overview of Renewable Energy	Professor Jack Hardity, University of Hull	University of Hull	20 th May 2008
Solar Energy	Professor Steve Kelly	University of Hull	25 th June 2008
Waste Management	Matthew Lewer, East Riding Council	HETA, Hull	24 th September 2008
Closing the Energy Gap	Martyn Kemp, Centrica	Killingholme Powerstation	22 nd October 2008
Composting/Organic Waste Processing	Dr John Adams, ETCIC, University of Hull	University of Hull	19 th November 2008

We are aiming to give participants a good chance to interact with the presenter and will thus limit attendance to 10 persons at each event on a first come, first served basis.

Events will be aimed at both primary and secondary teachers, not limited to those that are directly associated with the 'Green STEM' project.

All seminars are free of charge, but in the event of non-attendance after reserving a place, an administration charge of £30 will be made.
